# TAINAN

Tainan, a good place to dream, to work hard, to fall in love, to get married, and to live happily ever after.

International Recruitment  
Manual for Tainan City

The first Homo Sapien of Taiwan was born in Tainan 20 to 50 thousand years ago.  
The first grain of rice of Taiwan was reaped in Tainan 4800 years ago.  
*Now, the city of Tainan is continuing to create new history.*

Tainan City is a municipality of ROC (Taiwan), located in the southwest corner of Taiwan and measuring 2192 square km. The Taiwan Strait lies to its west, the Alishan Mountains to its east, Chiayi County to its north, and Kaohsiung to its south. Tainan has around 1,886,000 residents.

The earliest record of Tainan City can be traced back to the 1620s. It is the oldest city in Taiwan. In fact, the term Taiwan was originally the old name for Anping. It was subsequently used to define the whole island. Since the 19th century, Tainan City has been the center of politics, economy, and finance for Taiwan. In recent decades, it has become one of the core cities of southern Taiwan. It also serves as the cultural and educational center of Taiwan, and is known as the cultural capital.

Other than history records, Tainan is the location where the oldest human activities were discovered. The discovery of the first Homo Sapien and grain of rice in Tainan explained how Tainan came to be an urban area. Such is the result of efforts from our ancestors.

Based on such a rich foundation, Tainan not only values its history, but is eager to meet the future. Facing competition from cities around the globe, the city government uses its own resources effectively, and combines data analysis with technological applications, to turn Tainan into a brand new city that contains both ancient and modern cultures.

In the future, Tainan shall keep embracing challenges with vigor and innovation.

# The Cultural Capital

文化首都

It has been 400 hundred years since the founding of Tainan. Thus, it is referred to as the cultural capital. Tainan has 22 national monuments, the highest number in the country. There are also 116 municipal monuments and 61 historical buildings. These sites contain rich historical and cultural significance. Tainan was the earliest administrative center of Taiwan. Therefore, many traditional rituals are kept here, such as the Memorial Ceremony for Confucius, Beehive Firecrackers, Five Rituals of Tainan, and Siraya Night Sacrifice.

Wangchuan Ritual

Beehive Firecrackers

## Beehive Firecrackers

Beehive Firecrackers consist of various types of firecrackers shaped like multiple rocket launchers. When the firecrackers are launched, they create a buzzing noise, hence the name Beehive Firecrackers. It was nominated as one of the top ten celebrations around the world.

Memorial Ceremony for Confucius

## Memorial Ceremony for Confucius

Showing the highest regard to Confucius with Liu I Wu, a tradition Tainan has preserved for 340 years.

Five Rituals of Tainan

## Five Rituals of Tainan

These are the five important pilgrimages along the coastal areas of Tainan, held once every three or four years.

Siraya Night Sacrifice

## Siraya Night Sacrifice

The Siraya clan is part of Taiwan's aborigines. In early times, Tainan was one of their residential areas. In Siraya tradition, the night sacrifice is held for the worshipping of Alid, while the traditional Dongshan Kabua Sea Howling Festival is considered an important national custom.

There many public and private museums along with local cultural centers. After the merging of county and city boundaries, the city has approved 41 public and private museums and local cultural centers.

## The National Museum of Taiwan Literature

is the first national museum of literature in Taiwan. It collects, preserves, and studies contemporary literary history of Taiwan. The museum itself is a national monument that was built over a hundred years. It was the former Tainan State Government during Japanese Colonial Era and was founded in 1916.

National Museum of Taiwan Literature

## The ChiMei Museum

is located in the Rende District of Tainan City. It was established by Shi Wen-long, the founder of Chi Mei Corporation. It is a private museum and owns the largest collection of artifacts in Taiwan.

ChiMei Museum

## The Tainan Astronomical Education Area

is located by Tsengwen River. The astronomic telescope, with main lenses of 76 cm in perimeter, is the largest one in Taiwan. It also has a 3D planetarium, the first of its kind to have a digital dome.

Tainan Astronomical Education Area

# A Paradise for Tourism

## 觀光樂園

There is one national park and two national scenic areas in Tainan City. Taijiang National Park and the Southwest Coast National Scenic Area are both located along the coastal regions on the west and are known for their preservation of shoal and wetland, as well as local salt production. The Siraya National Scenic Area is located on the eastern mountains, in which Sirayan aboriginal culture, hot springs, and abundant natural views can be found.

The Chiku District of Tainan is the habitat of the black faced spoonbill. There are more than a thousand black faced spoonbills that come to Chiku for winter. In November 28<sup>th</sup>, 2010, there were 1671 spoonbills present, more than half of the total number of spoonbills across the globe.

1. Taijiang National Park has abundant natural elements. Sicao Green Tunnel, which consists of mangroves, is a popular wetland in Tainan.
2. Moonworld of Caoshan in Zuozhen District is full of rocky outlines. The view of Moonworld changes according to seasons, dawn, and dusk.
3. Cigu Lagoon is the most precious lagoon in Taiwan. Not only is it the remaining site of the Taijiang Inland Sea, but it also contains rich natural resources and special aquaculture, marking the lagoon as a hot spot for tourism.

Tainan is the oldest city in Taiwan and it is also the source of various delicacies. The local foods have been ranked as a must-try element by the Michelin Green Guide.

In addition to traditional rice, noodles, and local foods, Tainan also produces mango, pineapple, rice and milkfish, which are popular among consumers.

The AU Optronics Corporation established the largest rooftop solar power plant in Tainan Technology Industrial Park. The power plant has the largest capacity for electricity in Tainan and is also the second solar power plant to receive a formal license, marking a milestone for green energy in Tainan.

# A Smart New City

智慧新城

The evolving technology will change how the city functions and how people live their lives. Tainan City combines the latest information technology with governance by developing six applications including a cloud system, smart traffic, smart learning, smart health, and smart tourism in order to improve its citizens' quality of life. The city government creates a smart managing center for the city. It saves government expenses through stable cloud equipment, fortified data integration, and unique capabilities of a cloud system. In terms of tourism, Bluetooth beacons will be installed. Combined with a mobile app, tourists can receive information on local vendors easier, creating a win-win situation.

## Low-emissions City

低碳城市

Due to global warming, Tainan has been working on energy saving and lowering carbon emissions. Tainan has ample access to daylight, and has completed establishment of a photovoltaic industry. It has been praised as the low-carbon southern city. As of January 2017, 3575 cases of photovoltaic projects have been approved, the highest number in Taiwan.

Tainan City Bus

Establishing a public transportation system and lessening the emissions of private vehicles are important for creating a low-carbon city. Since 2013, Tainan has been promoting Bus Rapid Transit Systematization. There are currently 9 mainlines, 74 branches, 19 urban bus routes, and two shuttles for high speed railway. In addition, there are six flexible bus routes and three tourist bus routes

Lin Feng Ying Bus Station

based on tourism, student commutes and daily usage. There are 110 bus routes in total. It not only provides swift transportation, but also helps lessen carbon emissions. Furthermore, T-Bike was founded on the principle of functioning as both a means of transportation and as a recreational tool. Cross-district one way rental is also available for citizens. After the T-Bike system goes online, 200000 tons of CO2 emissions can be reduced, helping to curb global warming.

T-Bike

T-Bike

As for education, the APK mobile platform has been developed. Courses can be conducted through the application and can also be recorded and uploaded to the cloud.

結合穿戴裝置作為教學工具

In order to improve traffic, Tainan plans to establish a smart control center for traffic and set down smart stop signs to make traffic smoother and swifter.

Smart Bus Movement APP

太陽能智慧公車站牌

Smart Health APP

Tainan will establish a cloud platform for health and enable citizens to upload their own health evaluation to the cloud. By connecting it with health cards, everyone will be aware of their own health condition. Furthermore, technology will be used in diminishing epidemics. A unity lab of anti-epidemics within city network will be founded to improve disease prevention in a smart city.

Tainan Flood Prompt Warning APP

In terms of disaster prevention, wearable equipment along with a 4G backup system will be developed in order to transfer the change of water and provide the latest information to disaster emergency operation centers.

# An Improving City

城市躍升

Tainan, a good place to dream, to work hard, to fall in love, to get married, and to live happily ever after.

Tainan Museum Of Fine Arts Architectural Presentation

Under the four levels of administration mentioned above, the result of constructions in Tainan will be revealed soon. In terms of culture, requests to the authorities have been made in order to establish a southern branch of the National Library. There are also plans to build the Main Library of Tainan City. Five cultural parks are on schedule to be built, along with the Tainan City Art Museum. The completion of these sites will solidify the cultural aspects of Tainan.

Asia Pacific International Baseball Training Center

Traffic influences civilians a lot; hence the city government plans to construct a high speed freeway system for Tainan, which consists of three pairs of crisscross routes and a living circle that can be circled within an hour. Furthermore, underground railways will be built as well. The last piece of public transportation in Tainan, the advanced transportation system, has

also received approval over part of the routes. Such designs will benefit citywide transportation. Tainan is heavily engaged in electricity generation via renewable energy. The photovoltaic industry has received top rankings in Taiwan. Shalun Green Energy Science City, which has received approval from the central government, will become an important location for national

green energy. The Tainan Conference Center and international cinema will be constructed in Shalun, contributing to a gathering place for diverse industries. The Asia Baseball Village is also under construction in order to build a baseball Mecca like Williamsport. With the future completion of construction work on cultural and traffic infrastructure, Tainan will become an even greater city.

# Universities and Colleges in Tainan

## National Cheng Kung University

The university was founded in 1931, besides of having fruitful results in scholarship, research, school-industry collaboration, National Cheng Kung University is a top university with full academic domains.
